PROFESSIONAL SUMMARY

BSIT student and aspiring Laravel / Full-Stack Developer with hands-on experience building web applications using Laravel, React, Inertia.js, MySQL, and Tailwind CSS. Experienced in developing a private resort booking website for a freelance client and building academic and portfolio projects involving data analytics, forecasting, and responsive web interfaces.

TECHNICAL SKILLS

Backend: PHP, Laravel, REST APIs

Frontend: React, JavaScript, TypeScript, Inertia.js, HTML, CSS, Tailwind CSS

Database: MySQL

Tools & Design: Git, GitHub, Docker, Figma

EXPERIENCE

Freelance Full-Stack Web Developer

Q8 Private Resort

- Built a private resort booking website for a freelance client using Laravel, React, Inertia.js, MySQL, and Tailwind CSS.
- Developed the application across the frontend and backend, integrating the user interface with application logic and database functionality.
- Delivered the project as a completed web application.

PROJECTS

Renewable Energy Decision Support System

Laravel, React, Inertia.js, MySQL, Machine Learning

- Developed an academic decision-support system for electricity-consumption analytics and next-month energy forecasting.
- Designed features for data management, analytics, forecasting, and renewable-energy decision support.

Q8 Private Resort Booking System

Laravel, React, Inertia.js, MySQL, Tailwind CSS

- Built a resort booking web application for a freelance client, supporting the resort's online reservation workflow.

Personal Developer Portfolio

Web Development, Responsive UI

- Created a personal portfolio website to present development projects and technical skills.

EDUCATION

Bachelor of Science in Information Technology (BSIT)

Our Lady of Fatima University – Quezon City | Expected Graduation: 2027
